

Better Keybindings

A better keybinding system for VS Code.

Installation:

This extension is private and not publicly available on VS Code's extension marketplace.

To install the extension, search for and select "Extensions: Install from VSIX..." from VS Code's command palette (**Cmd+Shift+P**).

Now you should see the extension show up in the Extensions panel:

Now that the extension is installed, the following keybindings should be ready for use:
